WORK EXPERIENCE

Software engineer

Frshr Technologies

10/2020 - 06/2021

Information Technology & Services - (Part-time)

Achievements/Tasks

- Contributed as a Full Stack Developer (**MEAN stack**).
- Provided the Android/iOS team with secure APIs with robust exception handling and **JWT authentication**.
- Developed responsive frontend applications with frameworks like **Angular & Bootstrap**.
- Implemented **AWS S3** in the backend architecture of a social media application which resulted in faster media loading speeds and **reduced the storage cost by 30%**.
- Ensured the secure deployment of the web applications on **AWS (EC2 / RDS), DigitalOcean and Heroku**.
- Contributed to the development of a **National award (DRDO)** winning product AIRecognize.

Contact: Sanket Koli (Front-End Lead) - kolisanket15@gmail.com

Software developer intern

Frshr Technologies

06/2020 - 09/2020

Information Technology & Services - (Full-time)

Achievements/Tasks

- Developed websites with Angular, Node.js, Knex and PostgreSQL (**PEAN**) stack.
- Worked on the backend architecture of a security product named PrimeID which is used to **verify users' identity** with state-of-the-art verification technologies like **Passbase**.
- Contributed to the development of an **online code editor** named CodeQuarks.

Contact: Sanket Koli (Fornt-End Lead) - kolisanket15@gmail.com

EDUCATION

M.Sc - Computer Science

Ramnarain Ruia College

2020 - Present

9.50 CGPA (Current)

Main Subjects

- Blockchain technologies
- Data Science
- Analysis of algorithms
- Cyber Security

B.Sc - Computer Science

Ramnarain Ruia College

2020

7.56 CGPA

Main Subjects

- OS, DBMS
- Computer Networks
- Software engineering
- Data structures, OOP

SKILLS

Javascript

Java

Dart

Solidity

Python

Node.js

React

Flutter

Angular

Web3

React Native

Git

Blockchain

HTML / CSS

MongoDB

PostgreSQL

Data Structures

OOP

AWS

DigitalOcean

Heroku

PROJECTS

Collective - (Flutter, Node.js, Ethereum)

- Developed an **equity crowdfunding mobile app** using Flutter which is managed by smart contracts deployed on **Ethereum blockchain network**.
- Created a platform exclusive **ERC20 token** named Collective token (CTV) which can be used by the users to invest into camps on the platform in exchange of equity.
- Deployed **solidity smart contracts** on ethereum using **truffle** and executed in-depth testing of the same using **Mocha and Assert**.
- Engineered a robust **Node.js** backend with **MVC** architecture and hosted it on **AWS EC2** along with **NGINX reverse proxy**.

VoterChain.com - (React, Node.js, Blockchain)

- Developed a **decentralized voting system** by implementing core blockchain concepts, React and Node.js.
- Integrated **Socket.io** to **create a blockchain network** to exchange data between nodes and validate the transactions.
- Implemented **OTP verification** to verify the identity of the voter.

KrishiGruha - (React native, Hedera Hashgraph)

- Developed a mobile platform for users to buy or sell the best **agricultural produce online** at the best prices **with crypto**.
- Integrated **Hedera hashgraph SDK** into the project which made payment with cryptocurrency (**HBAR**) possible.
- Created a robust Node.js backend with **JWT authentication** for the react native app and hosted it on **Heroku**.

CERTIFICATES

Ethereum and Solidity - The complete guide (09/2021)

Udemy - [Certificate Link](#)

Mastering Data Structures and Algorithms (09/2021)
