WORK EXPERIENCE

Software engineer
Frshr Technologies

10/2020 - 06/2021
Information Technology & Services
Achievements/Tasks

- Worked as a Full Stack Developer (MEAN stack).
- Provided the Android/IOS team with secure APIs with robust exception handling and JWT authentication.
- Ensured the secure deployment of the web applications on AWS (EC2/S3/RDS), DigitalOcean and Heroku.
- Developed prototypes for web applications with Adobe XD and Adobe Illustrator.
- Contributed to the development of National award (DRDO) winning product AIRecognize.

Contact: Piyush Bajaj (Tech Lead) - 7783870604

Software developer intern
Frshr Technologies

06/2020 - 09/2020
Information Technology & Services
Achievements/Tasks

- Developed websites with Angular, Node.js and PostgreSQL. (PEAN) stack.
- Worked on a security product called PrimeID which is used to verify users' identity with state-of-the-art verification technologies like Passbase.
- Contributed to the development of an online code editor named CodeQuarks.

Contact: Piyush Bajaj (Tech Lead) - 7783870604

EDUCATION

M.Sc - Computer Science
Ramnarain Ruia College

2020 - Present

B.Sc - Computer Science
Ramnarain Ruia College

2020

HSC - Science
Ramnivas Ruia College

2017

SKILLS

Javascript · React · Flutter · React Native · Angular · Blockchain · Solidity · Node.js · HTML/CSS/Bootstrap · MongoDB · PostgreSQL · AWS · DigitalOcean · Python · Data science · Java · Adobe XD / Illustrator · Git

PROJECTS

Workspace.com [Node.js, MongoDB, Heroku] ⬈
- Developed a freelancing website for freelancers to find work online and to work on projects as a team.
- Integrated chat and to-do list which resulted in an increase in productivity.
- Utilized Passport.js for secure authentication which played a key role in user account security.
- MEN (MongoDB,Express.js,Node.js) stack used for development.

VoterChain.com [Blockchain] ⬈
- Developed a decentralized voting system by implementing Blockchain.
- Integrated Socket.io to create a blockchain network to exchange data between nodes.
- Implemented OTP verification to verify the identity of the voter.
- MERN (MongoDB,Express,React,Node.js) stack used for development.

KrishiGruha [React native] ⬈
- Developed a mobile platform for farmers/customers to buy/sell their products online at the best and standardized prices.
- Implemented stack and drawer navigation in the app with the help of react navigation.
- Created a robust Node.js backend for the react native app and hosted it on Heroku.
